Visa Status: Canadian Permanent Resident

Present Location: Toronto, Canada

Professional Summary:

- **Java Full Stack Developer** with **5+ years** of experience building scalable, AI-enabled enterprise applications using Java, Spring Boot, ReactJS, Angular, Node.js, REST APIs, HTML5/CSS3, and modern JavaScript frameworks in Agile environments.
- Strong expertise skills in designing and developing high-performance full-stack applications, micro-services, reusable UI components, and responsive cross-browser web solutions using modern development tools and design patterns.
- Hands-on experience integrating Spring AI, LLM-based applications, Agentic AI workflows, predictive analytics, automation systems, and intelligent business solutions while following SDLC, TDD, and best coding practices.
- Skilled in backend development with Spring Boot, API integration, database management, debugging, performance optimization, testing frameworks (JUnit, Jasmine, Karma, Mocha), and version control tools including Git and Bitbucket.
- Adaptive and collaborative professional with strong communication and problem-solving skills, capable of quickly learning emerging technologies and delivering innovative AI-powered enterprise solutions.

Skills:

- **Languages & Frameworks:** Java, TypeScript, JavaScript, Spring Boot, Spring Cloud, Spring AI, ReactJS, Node.js
- **Frontend Technologies:** ReactJS, HTML5, CSS3, Responsive Web Design, REST API Integration
- **Backend Development:** Microservices Architecture, RESTful APIs, Distributed Systems, Event-Driven Applications
- **AI & Intelligent Systems:** Spring AI, LLM Integrations, Agentic AI Workflows, Predictive Analytics, AI Automation
- **Cloud & DevOps:** AWS, Docker, Kubernetes, Jenkins, CI/CD Pipelines, DevOps Automation
- **Databases:** MongoDB, Cassandra, MySQL, Oracle, JPA, Hibernate
- **Messaging & Streaming:** Apache Kafka, Spark, Real-Time Data Processing
- **Security & Architecture:** Authentication, Authorization, Scalable Cloud-Native Architecture, API Security
- **Testing & Development Practices:** JUnit, TDD, Agile/Scrum, SDLC, Performance Optimization
- **Tools & Platforms:** GitLab, GitHub, JSON, NGINX, Linux, IntelliJ IDEA, Eclipse

Professional Experience:

Client: Citi Bank, Mississauga, Canada

Period: Mar 2024 to Present

Role: Java Full Stack Developer

Roles and Responsibilities:

- Designed and developed AI-enabled, responsive UI pages using HTML5, CSS3, JSON, ReactJS, Ext.js, jQuery, TypeScript, JavaScript, and modern web technologies.
- Collaborated with cross-functional teams to develop scalable front-end architectures and intelligent user interfaces using ReactJS and modern responsive design frameworks.
- Developed Single Page Applications (SPA) using ReactJS with AI-driven dynamic data binding, state management, and seamless REST API integrations.
- Created reusable React components, custom hooks, services, and AI-powered UI workflows across enterprise applications.
- Implemented intelligent routing, dynamic navigation, and multi-modal workflows using modern React routing libraries.
- Built mock services, predictive test data, and AI-assisted frontend prototypes to accelerate UI development before RESTful API completion.
- Utilized modern JavaScript frameworks to bind UI components with backend services while optimizing application performance and scalability.
- Debugged and optimized applications using browser developer tools, DOM manipulation techniques, and performance monitoring strategies.
- Designed and developed presentation layers using ReactJS, Material UI, and responsive UI frameworks aligned with enterprise UX standards.
- Created wireframes, AI-assisted UI mockups, and user-centric designs based on stakeholder requirements while adhering to UX and accessibility standards.
- Collaborated with UX designers to improve user experience through card sorting techniques, intelligent UI recommendations, and usability analysis.
- Enhanced existing web applications by integrating database-driven dynamic content and ensuring WCAG-compliant accessibility standards.
- Estimated development timelines, implemented UI prototypes using JavaScript and CSS, and incorporated stakeholder feedback through iterative Agile delivery.
- Utilized Jenkins for Continuous Integration (CI), Continuous Deployment (CD), automated build pipelines, and deployment workflows.
- Implemented multiple front-end modules using reusable NPM packages to improve scalability, maintainability, and performance.
- Collaborated with QA teams, Scrum Masters, Business Analysts, and clients to troubleshoot issues, optimize workflows, and deliver AI-enhanced business solutions.
- Performed System Testing and Regression Testing for enterprise UI applications to ensure stability, usability, and performance after issue resolution.
- Developed responsive web applications supporting desktop and mobile platforms through adaptive and device-independent design strategies.
- Built predictive reports, analytics dashboards, and business metrics to support strategic planning and AI-driven decision-making initiatives.
- Retrieved, analyzed, and interpreted large datasets to generate key business insights, predictive analysis, and roadmap recommendations.
- Participated in Agile sprint planning, backlog grooming, and collaborative software development processes for continuous product improvement.

Environment: HTML5, HTML, CSS3, CSS, JavaScript, TypeScript, ReactJS, jQuery, Ext.JS, Angular 8/7, REST APIs, Spring AI, LLM Integrations, Agentic AI Workflows, Predictive Analytics, AI-powered Automation Tools, Google Analytics, Adobe Analytics, SharePoint, WCAG, MS Office, Excel, Jira, Jenkins, Karma/Jasmine, Confluence, GitHub, Git, NPM, Webpack, JSON.

Client: IBM, Halifax, Canada

Period: Jan 2021 to Feb 2024

Role: Java Developer

Roles and Responsibilities:

- Implemented load-balancing with NGINX and scalable cloud-based microservice architectures to support thousands of concurrent users and high-availability enterprise applications.
- Developed responsive user interfaces using JSP, JavaBeans, JSTL, JavaScript, CSS, jQuery, ReactJS, Node.js, AngularJS, and HTML5 to improve application performance and user experience.
- Developed automated daily jobs using PL/SQL stored procedures to process notifications, business workflows, and reporting operations.
- Worked in Agile/Scrum environments while maintaining sprint planning, workflow tracking, and project documentation using Rally.
- Hands-on experience with RESTful and SOAP web services, MVC architecture, Hibernate persistence, and enterprise cloud-based application integrations.
- Developed and executed unit testing scripts using JUnit, PowerMock, and TDD methodologies to ensure application quality and reliability.
- Provided architecture design, mentoring, and framework implementation guidance for scalable enterprise web applications.
- Implemented microservices using Spring Boot, Spring Cloud, and Spring MVC to build scalable and cloud-ready enterprise applications.
- Optimized microservices using Node.js, ES6, and Cassandra NoSQL databases for high-performance distributed systems.
- Developed Spark-Kafka Producer/Consumer modules and real-time data processing applications using Java, J2EE, Kafka, and distributed streaming architectures.
- Built RESTful APIs and enterprise web services using ReactJS, AngularJS, Node.js, and cloud-native backend integrations.
- Developed backend logic using Golang, Gin, and Gorm frameworks while resolving full-stack production issues through GitLab and distributed system tracing.
- Designed and implemented container-based polyglot microservice architectures using Docker, ActiveMQ, AWS cloud services, and scalable distributed infrastructure solutions.
- Implemented unit test cases and test suites using JUnit frameworks while providing technical direction for JavaScript, jQuery, and AJAX-based applications.
- Played a key role in configuring Apache web services and deploying enterprise applications on Tomcat, AWS environments, and cPanel application servers.
- Worked extensively with CI/CD pipelines using Jenkins for automated builds, deployments, testing, and DevOps workflows.
- Developed modern responsive web applications using ReactJS, Node.js, AngularJS, and Bootstrap for enterprise-grade user experiences.
- Developed Servlets, Data Access Layer components, and JDBC integrations while harmonizing multi-source data streams using Kafka-based processing pipelines.
- Designed backend Java classes for secure data access, authentication, authorization, and enterprise business logic implementations.
- Utilized Hibernate ORM and JPA frameworks for entity relationship mapping, database integration, and optimized persistence management.
- Developed Data Access Layers using Spring JDBC and created SQL queries and stored procedures for Oracle database interactions and reporting systems.
- Developed and optimized scalable services using Node.js, ES6, Cassandra NoSQL, and distributed cloud-native architectures.
- Enabled secure authentication and authorization mechanisms across MongoDB instances and distributed enterprise systems.
- Redesigned and re-implemented scalable services using NGINX, Node.js, Express.js, MongoDB, MySQL, and AWS cloud services.

- Implemented contract administration and real-time streaming services using Kafka, Spark, Java, and event-driven architectures.
- Designed backend APIs using Express.js and Mongoose frameworks and integrated MongoDB for scalable data management solutions.
- Assisted in analyzing complex enterprise databases and systems to generate reports, insights, and production support resolutions.
- Created technical documentation, troubleshooting guides, and knowledge base solutions for production support and go-live activities.

Environment: Eclipse, Java, Spring Boot, Spring Cloud, JavaScript, TypeScript, ReactJS, Node.js, AngularJS, Golang, Kafka, Spark, Hibernate, JPA, RESTful APIs, SOAP Web Services, AWS, Docker, MongoDB, Cassandra, MySQL, Oracle, Jenkins, NGINX, Tomcat, JBOSS, JSON, XML, JUnit, GitLab, jQuery, CSS, HTML5.

Education:

- Bachelor of Engineering in Computer Science | India

Present Location:

- Toronto, Canada
-
